Until Our Most Fantastic Demands Are Met, Fantasy Will Always Be: At War With Society

Our utopia is an environment that works so well we can run wild in it.

Society attempts to suppress fantasy, but fantasy springs up again and again, infecting the youth, waging urban guerrilla warfare, sabotaging the smooth functioning of bureaucracies, waylaying the typist on her way to the water-cooler, kidnapping the executive between office and home, creeping into the bedrooms of respectable families, hiding in the chambers of high office, gradually tightening its control, eventually emerging into the streets, waging pitched battles and winning (its victory is inevitable).

We are the vanguard of fantasy.

Where we live is liberated territory in which fantasy moves about freely at all hours of the day, from which it mounts its attacks on occupied territory.

Each day brings new areas under our control.

Each day a new victory is reported.

Each day fantasy discovers new forms of organization.

Each day it further consolidates its control, has less to fear, can afford to spend more time in self-discovery.

Even in the midst of battles, it plans the cities of the future.

We are full of optimism.

We are the future.

IMMIGRANTS
ARE NOT

THE

ENEMY

I Was Gonna Fight Fascism, But:

- I was just a bit tired
- I didn't want to be rude?
- Honestly, I've just had *so* much on, you *literally* wouldn't believe it
- I looked over at Jenny, and I don't think Jenny was fighting fascism, so I didn't either
- No-one wants to be *that* guy
- I just don't think that the left/right political spectrum really *applies* in the modern age?
- Does it make any *difference* though?
- I was really angry with the other people fighting fascism, so I went on Facebook and said some nasty things instead
- I was afraid. I didn't realise it at the time, but I was afraid
- It was too late

HOW TO END DEMOCRACY IN TEN STEPS

by Victor Orbán expert John Shattuck

One: Take over your party and enforce internal party discipline by using political threats and intimidation to stamp out all party dissent.

Two: Build your base by appealing to fear and hate, branding immigrants and cultural minorities as dangers to society, and demonizing your opponents as enemies of the people.

Three: Use disinformation and lies to justify what you're doing.

Four: Use your election victory to claim a sweeping mandate — especially if you don't win a majority.

Five: Centralize your power by destroying the civil service.

Six: Redefine the rule of law as rule by executive decree. Weaponize the state against all democratic opponents. Demonize anyone who doesn't support the leader as an "enemy of the people."

Seven: Eliminate checks and balances and separation of powers by taking over the legislature, the courts, the media, and civil society. Target opponents with regulatory penalties like tax audits, educational penalties such as denials of accreditation, political penalties like harassment investigations, physical penalties like withdrawing police protection, and criminal penalties like prosecution.

Eight: Rely on your oligarchs — hugely wealthy business and financial leaders — to supervise the economy and reward them with special access to state resources, tax cuts, and subsidies.

Nine: Ally yourself with other authoritarians like Vladimir Putin and support his effort to undermine European democracies and attack sovereign countries like Ukraine.

Ten: Get the public to believe that all this is necessary, and that resistance is futile.
